Portal «Leader of Ukraine» / Database of agrarians of Ukraine [www.idcompass.com](http://www.idcompass.com) — effective marketing communication between agrarians and companies of various fields. This is evidenced by our age — more than 25 years of successful work!

In Google, we are in the top three when searching for «Agricultural Database» etc. Each oblast has a representative who, for a month, works out one district of his oblast with «live» trips to the countryside. We fruitfully cooperate with territorial communities, information about which can be found at the end of each district.

All this shows that we take our business seriously, value our reputation and are reliable partners!

See «Demo version» on the portal.

Our enterprise was established in 1992 near the city of Sivrskodonetsk (until 2024 — Sevirodonetsk), Lugansk region, Ukraine. From the very beginning, our enterprise was oriented towards the development of gas analysis equipment for industrial enterprises. After the occupation of the place, our team began to work at the Dnipro metro station and expanded the range of services in the gas analytical sphere, having first created a laboratory — sample preparation units, a gas regulator, and a flow buster. At the same time, our company began to provide services in the repair and maintenance of early emergency detection systems, gas control systems, environmental monitoring systems, automated control systems for combustion processes, monitoring systems exhaust gases and others.

Our specialists in gas analysis systems are at the forefront of technological development in the field of gas analysis. Currently, we have developed a technological base for the production of gas analysis systems, as well as the repair of gas analyzers of various manufacturers. We provide highly qualified consultations on the development of gas analysis systems and optimization of industrial processes.
