

XXII International Trade Fair

POWER ENGINEERING FOR INDUSTRY 2025 POST-SHOW REPORT

POWER ENGINEERING FOR INDUSTRY

This year, the XXII International Energy Business Forum "5E" once again confirmed its status as the main industry event in Ukraine. This unique congress and exhibition event, which has no analogues among exhibition projects in Ukraine in terms of format and scale, took place on October 14–16, 2025, at the International Exhibition Center, comprising a series of exhibitions and business events.

The positive assessment of the exhibitions by exhibitors and attendees is the result of diligent teamwork, the ability to unite the professional community from various countries for the presentation of cutting-edge technologies and business meetings, and the skill to be efficient and achieve set goals.

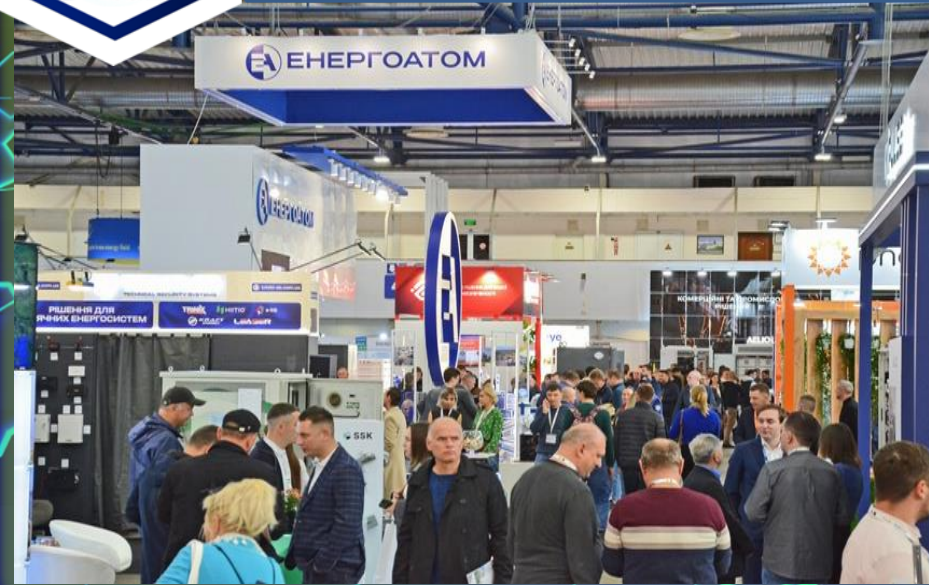

FORUM "5E" FORMAT

BUSINESS PROGRAM

POWER ENGINEERING FOR INDUSTRY

The large-scale exposition covered all energy sectors: from technologies for the extraction and production of energy resources to the generation of electricity, its storage, transmission, distribution, and consumption. The synergy of industry events brought together a significant number of advanced technologies, modern equipment, and machinery at the International Exhibition Center (IEC) venue.

Despite the ongoing challenges, domestic and international businesses demonstrated incredible resilience and the desire to implement innovations that are changing Ukraine's energy landscape and ensuring the sustainability of the energy system.

POWER ENGINEERING FOR INDUSTRY

The exhibitions were attended by world market leaders, as well as leading domestic and foreign manufacturers and suppliers of goods and services.

The exposition presented a wide range of electrical equipment for various voltage levels, power and electromechanical installations, electronic devices, automation and control systems, and energy storage and backup power systems applied across various industries and fields.

The companies not only presented their products but also paid great attention to the unique design of their stands, their content, and interactive elements, which typically strengthens the company's image, improves demand for its products, and creates a functional exhibition space.

POWER ENGINEERING FOR INDUSTRY

On October 14, the official opening of the International Energy Business Forum "5E", sectoral exhibitions and the 10th International Congress of Power Engineers was attended by:

Andrii KONONENKO – Deputy Secretary of the National Security and Defense Council of Ukraine

Andrii GERUS – People's Deputy of Ukraine and Chairperson of the Verkhovna Rada of Ukraine Committee on Energy, Housing and Utilities Services

Ruslan SLOBODIAN – NEURC Member

Vitalii ZAICHENKO – Head of the Management Board of NPC "Ukrenergo"

Mariia MALAYA – First Deputy Head of the State Agency on Energy Efficiency and Energy Saving of Ukraine

Mykhailo BUBNOV – General Director of Schneider Electric Ukraine

Oleksandr SVETELIK — President of the International Council on Large Electric Systems (CIGRÉ) in Ukraine

Ivan TKACHENKO — Head of Kyiv Global Expo Company

Anatolii TKACHENKO — Director General of the International Exhibition Centre (2000–2025)

POWER ENGINEERING FOR INDUSTRY

In their welcoming speeches, the esteemed guests emphasized the importance and relevance of the exhibition event, which will contribute to determining priorities and technological solutions for the sustainable operation of Ukraine's energy system.

On the occasion of the tenth anniversary of the Congress of Power Engineers, a Letter of Appreciation was presented to Oleksandr Svetelik, the President of the International Council on Large Electric Systems (CIGRÉ) in Ukraine, for fruitful cooperation and valuable contribution to the organization and annual holding of the Congress.

Words of gratitude were expressed by Ivan Tkachenko, the Head of International Exhibition Company, and Anatolii Tkachenko, the Director General of the International Exhibition Centre (IEC) from 2000 to 2025.

XXII International Trade Fair POWER ENGINEERING FOR INDUSTRY '2025

Thanks to the courage and resilience shown by our soldiers at the frontline and Ukrainian power engineers on the energy front, Ukraine is demonstrating its ability to remain effective and to implement new technological solutions for the development of the energy sector.

The International Exhibition Power Engineering for Industry, which was established in 2003, is currently an essential top exhibition event in Ukraine in the sector of energy, electrical engineering, and energy saving.

The event gathers the engineering and power elite, the professional community of Ukraine and other countries, focusing a vast amount of products on a single platform.

POWER ENGINEERING FOR INDUSTRY

The exhibitors are global and domestic leaders in the electrical engineering and energy markets, alongside key enterprises specializing in the production of energy and electrical equipment, the development of energy projects, and the automation and digitalization of electric power, electrical, and electromechanical systems and complexes.

The exposition featured the latest technologies and efficient electrical and power equipment for power plants, substations, high-voltage transmission lines, distribution power grids, and large power supply systems for industrial enterprises.

RESULTS

OF THE X INTERNATIONAL CONGRESS OF POWER ENGINEERS DIRECTIONS AND PRIORITIES FOR THE RECONSTRUCTION OF UKRAINE'S ENERGY SECTOR

October 14, 2025

The Congress's decade-long history demonstrates sustained, multi-year engagement from a vast array of industry professionals, including leading experts, public officials, highly skilled specialists, academics, and representatives from professional associations, financial institutions, and international organizations.

**Organizers: Ukrainian National Committee of CIGRÉ and
International Exhibition Company**

Even though the war is still ongoing, the Congress, as a powerful national and international platform, united the influential energy community under one roof.

The Congress was attended by representatives of foreign embassies, experts, top managers of generating and power grid companies, heads of industrial enterprises, representatives of specialized public associations, scientific institutions, territorial communities, and others.

Speakers presented solutions for modernizing energy systems, energy storage, network automation, and the development of decentralized power sources. Issues of post-war recovery, the development of distributed generation, digitalization, energy management, and cooperation between the state and business in creating sustainable energy solutions were discussed.
